MARSICO INTERNATIONAL OPPORTUNITIES FUND

(MIOFX/MIIOX)

Take Advantage Of Growth Potential On An International Scale

The world continues to innovate and evolve as people become more connected, businesses expand their global reach, and consumers take advantage of innovative services and products. The Marsico International Opportunities Fund (the "Fund") seeks to capitalize on various secular trends fueling growth across the globe through a portfolio of high quality, growth-oriented international companies.

"Digital transformation and the emerging middle class are compelling catalysts for international growth."

For Marsico Capital Management, LLC, it's about company first and not the country of domicile. Sector agnostic, the portfolio is informed by a blend of the adviser's top-down macroeconomic analysis and early identification of long-term secular themes with bottom-up stock selection.

Opportunity Driven By Game-Changing Themes

The Marsico International Opportunities Fund seeks to capitalize on opportunities provided by many game-changing, long-term secular global themes, including:

- » **Digital Transformation:** The ongoing digitization of business processes, along with consumer demand to engage on digital platforms, has allowed companies to create new business models and disrupt traditional ones. E-commerce, global payment systems, mobile gaming, and electric vehicles are all examples of this disruptive digital theme.
- » **The Global Emerging Middle Class:** The growing wealth and spending power of consumers around the world is fueling demand for goods and services ranging from travel and luxury goods to housing and financial services.
- » **Life Sciences Innovations:** Advances in diagnostic tools, disease-modifying therapies, robotic surgeries, and innovative services like telemedicine have improved the quality of life for many, as life expectancies on a global basis increase.

Fund Facts

As of 12/31/2023

Holdings: 30

Fund Assets: \$39.6M

A Portfolio Of High-Quality, Innovative, Industry Leaders

With a focus on growth within identified secular themes, the Fund is poised to capitalize on growing international opportunities by investing in a select portfolio of compelling large-cap international companies that feature:

- » Excellent Management Teams
- » Strong Brand Franchises
- » Superior Size/Scale Characteristics
- » Positive and Transformative Catalysts
- » Attractive Operating and Cash Flow Metrics
- » Strong, Conservative Balance Sheets

The result is a portfolio of what the adviser believes to be high-quality, innovative international companies that offer impressive levels of growth and market leadership.

An Alpha-Generating Complement To An International Allocation

Participation in secular themes through market-leading, innovative companies potentially provides investors with a performance-oriented growth complement to a broader international allocation.

In fact, the Fund⁴ has outperformed the MSCI EAFE Index^{5,6} and the MSCI All Country World ex USA Index^{5,6} over the 5-year, 10-year, and since-inception annualized periods as of 12/31/2023.⁷

Performance data quoted throughout represents past performance. Investment return and principal will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance information quoted. To obtain the Fund's performance current to the most recent month-end, please visit marsicofunds.com or call 888-860-8686. The Fund's performance, especially for short time periods, should not be the sole factor in making an investment decision.

Important Information

Please consider the Fund's investment objectives, risks, charges, and expenses carefully before investing. To obtain a prospectus, which contains this and other information about the Fund, call 888-860-8686 or visit marsicofunds.com. Please read the prospectus carefully before investing.

Investments in foreign securities generally, and emerging markets in particular, involve risks that may differ from or at times exceed the risks of U.S. investments for a variety of reasons such as, without limitation, unstable international, regional, or national political and economic conditions, diplomatic developments such as sanctions, embargoes, trade tariffs, trade limitations or trade wars, less stringent investor protections and disclosure standards, currency fluctuations, foreign controls on investment and currency exchange, foreign governmental control of some issuers, potential confiscatory taxation or nationalization of companies by foreign governments, sovereign solvency considerations, withholding taxes, a lack of adequate company information, less liquid and more volatile exchanges and/or markets, ineffective or detrimental government regulation, varying accounting, auditing, disclosure, and reporting standards, political or economic factors that may severely limit business activities, legal systems or market practices that may permit inequitable treatment of minority and/or non-domestic investors, immature economic structures, and less developed and more thinly traded securities markets. In addition, the Fund and the stocks and markets in which it invests are subject to other general risks that include unforeseen events such as pandemics, volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

¹ Source: Morningstar, Foreign Large Growth Funds Category.

² Performance data and Morningstar data available for the Institutional Class is limited because the Institutional Class commenced operations on December 6, 2021.

³ The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. © 2024 Morningstar, Inc.
